Products

Photocatalytic Air Purification PCF®

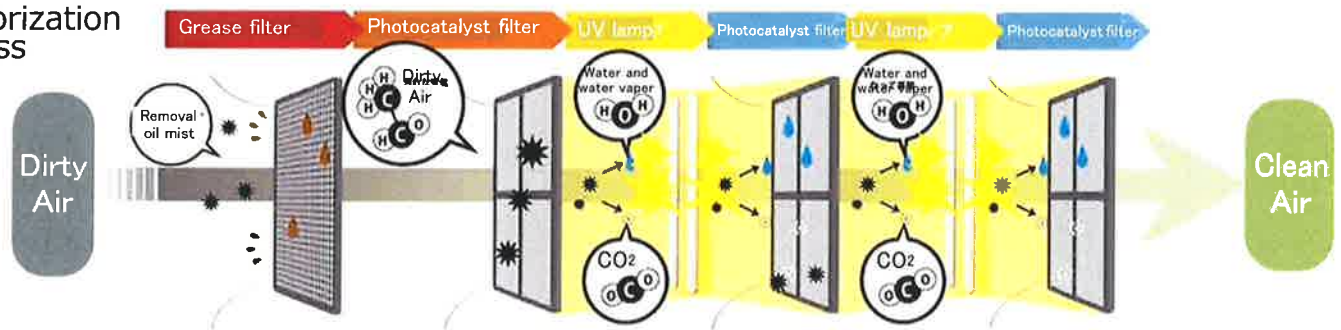

SUSTAINABLE
DEVELOPMENT
GOALS

■ Cartridge

■ Deodorization process

1. About Products

Business Deodorization system using photocatalytic technology

<Examples of use>

- For the food and kitchen exhaust of large shopping centers, compliance with regulatory standards and short circuit prevention to other stores.
- Comply with regulatory standards and reduce the impact on local residents for cooking exhaust at the school lunch Center.
- Reduction of peripheral effects on the exhaust of animal chambers such as pharmaceutical laboratories and hospitals.
- Measures for odor related to sewage treatment plants, printing factories, paint factories, etc..
- In addition, it is worth considering in all industries that need measures against odor.

2. Advantages

- Significantly reducing the load on the surrounding environment, it leads to the elimination of claims and the improvement of the working environment.
- The filter is long life by photocatalytic action, since it has a self-regeneration function, there is no need for frequent replacement of the waste treatment and adsorbents such as adsorption method such as activated carbon, a low running cost.

3. Expected business partners and customers

- Government
- Developer, General Contractors, Subcontractors
- Equipment Distributor
