ENVIRONMENTAL PROCEDURES CONSULTING SERVICE

SERVICE SUPPLY PROCESS

ENVIRONMENTAL IMPACT ASSESSMENT REPORT SERVICE

Environmental impact assessment (EIA) report is a mandatory procedure for new and operating investment projects before project construction.

Subjects must make the EIA

- ✓ New factory construction
- ✓ Factory expansion, capacity increase
- ✓ Changing production technology
- ✓ Importing scarp as raw materials for production

Depending on the type, scale and capacity, the project must make an environmental impact assessment report (EIA) or an environmental protection plan (EPP).

1 Preliminary survey

Send customer a list of documents to be provided, environmental monitoring at the project site

2 Make EIA report

Make EIA report based on provided information and environmental monitoring results

3 Community consultation

Organize community consultation meetings in the locality where the project is located.

4 Submit EIA report

Submit documents to the authorities, support the inspection and appraisal process until approval

E&H also supports other procedures after completing project construction: Environmental License, Environmental Registration, Trial Operation & Confirmation of completion of environmental protection works, etc.
