

IA-300

Ion analyzer

Easy simultaneous measurement of multiple ions

Easier and more familiar ion analysis !

Six cation items or seven anion items are simultaneously measured using the ion chromatograph method.

Anion : PO₄, F, Cl, NO₂, Br, NO₃, SO₄

Cation : Li, Na, NH₄, K, Mg, Ca

○ Easy operation for anybody

Measurement can be simply done by just injecting a sample!

Analysis and calculation of data are performed automatically by the system itself, and measurement results are displayed and printed.

○ Suppressor method is also available for anion measurement

○ Labor saving achieved by automatic measurement of multiple samples

Automatic measurement of multiple samples is possible by connecting the optional auto sampler.

Product Information on IA-300 is introduced on our company website.

◆ Example of display and printing

Quantitation value and chromatogram can be displayed and printed.
