

Cedar Wood Powder Portable Toilet

Contributing to climate change

Mitigation

- ✓ Wood powder is made by grinding discarded timber and thinned wood from Naka Town.
- ✓ Utilizing timber means caring for the forest which protects carbon sinks and decrease disaster risks.
- ✓ Revitalizing the wood industry contributes to community development.

Adaptation

- Extreme weather events are increasing with climate change. Lack of water and toilets are common issues during disasters.
- ✓ Stockpiling portable toilets is recommended to ensure a hygienic sanitary environment during disasters.
 - ✓ Our portable toilet prevents odor and provides relaxation with wood fragrance.
