PRESENTERS

Yaguchi Electric Corp.

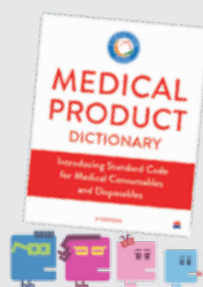

Yaguchi Electric Corp. has developed a medical device, called Occlu-tab, which applies a special "invisible LCD", making it possible to use both eyes open for curing child amblyopia.

NEC Corporation

NEC Corporation is a global leader in healthcare technology solutions, driving breakthroughs in digital healthcare infrastructure and medical IT. Our expertise encompasses the development of patient management systems, telemedicine platforms, and advanced healthcare analytics to enhance the efficiency and quality of healthcare delivery worldwide.

Carna Medical Database

Carna Medical Database offers customized consultation by leveraging their close connections with local hospitals, wholesalers, and medical associations in the Indian medical industry.

iKure TechSoft

iKure is a Population Health Management company that delivers primary healthcare services to the last-mile population.

PRESENTERS

PATH

PATH is a global non-profit that works on vaccines, drugs, medical devices, diagnostics, digital tools, and innovative approaches to strengthen health systems.

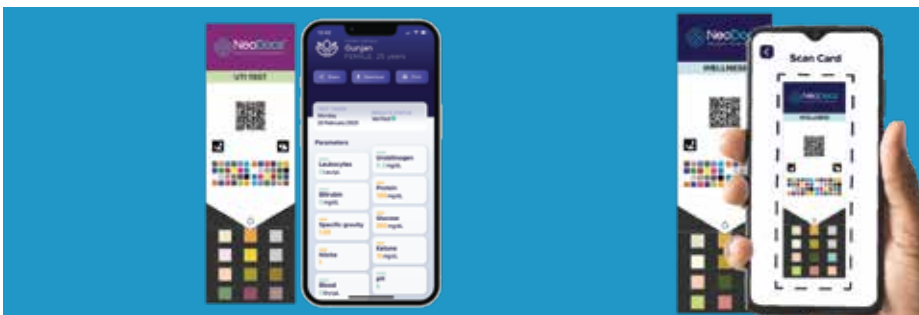

The Disruptor in Diagnostics

Redcliffe Labs

Redcliffe Labs is a rapidly expanding omnichannel diagnostics service provider in India, operating in 220+ cities. They have a network of 80+ advanced labs and 2000+ Collection Centers, offering home sample collection services nationwide.

NeoDocs

NeoDocs, a YCombinator and Omidyar backed health-tech startup, was founded by IIT Bombay alumni Nikunj, Anurag, and Pratik. They develop instant, smartphone-based tests for use in clinics, homes, offices, during travel, or in hospitals.

LarkAI

Lark AI pioneers AI-driven solutions for personalized health management. From virtual health coaching to intelligent symptom monitoring, we're dedicated to advancing accessible and effective healthcare through innovative technology.
